

Another great net from N&K Dip Nets

New

The Industrial Scoop Net

Net your fish quicker and easier with our new "scoop" frame

- Front of the frame angles upward to create a scoop. Fish are drawn down inside rather than escaping out over the top as with a flat frame.
- Reinforced with extra support on the front edge — yet still lightweight to use.
- Narrower and longer than our other 55" circumference frames. Makes sorting fish more precise. Also works well for scooping bait fish.
- Can be used with our aluminum handles or our fiberglass handles for electro-shocking.
